The Domestic Economy

Domestic Economic Conditions

Production

The volume of the domestic agricultural produces supplied to the Talamahu Market declined by 21.2 percent during the six months ended June 2004, compared with the 35.0 percent increase during the previous six months and the 44.2 percent decrease during the same period last year. The decline in local supplies was attributed mainly to a seasonal decline in fruits and vegetables, and reduction in the supplies of root crops. The supplies of root crops (mainly taro and cassava) declined by 17.2 percent during the period reviewed, compared with the 21.5 percent increase during the previous six months and the 8.9 percent decline during the same period last year. The decrease in fruits and vegetables reflected the seasonally short supplies of pawpaw, oranges and lemons (*Figure 1, S22*).

Figure 1. Talamahu Market Production

Agricultural exports were led by root crops with a total value of almost \$0.9 million for the six months ended June 2004, compared with a total value of almost \$0.7 million for the previous six months and \$0.9 million for the same period last year. The root crops exported were mainly yams, taro and cassava. Other agricultural exports included kava and vanilla.

Fishing

The fishing sector did not improve much during the six months ended June 2004. The trade data indicated that the value of fish exports declined by 59.6 percent to \$3.6 million from \$8.8 million in the previous six months. The low fish catch rate due to the El Nino

weather condition, high transportation cost and lack of capital investments continued to affect the performance of the fishing industry. The Ministry of Fisheries is exploring ways to strengthen the industry.

Tourism

Based on overseas exchange transaction records, tourist receipts decreased by 15.9 percent, compared with the 24.9 percent increase during the previous six months and the 6.4 percent rise during the same period of the previous year. The decline in tourist receipts reflected the decrease in the number of visitors arriving by air which was affected by the ending of Royal Tongan Airline (RTA) flights.

Construction

During the second half of 2003/04 financial year, several major construction projects were completed and new construction projects had commenced such as the LDS church building projects, Fund Management cinema complex, European Union funded projects, the Tonga High School project and other residential buildings.

Sales of construction materials during the six months ended June 2004, as shown by partial indicators decreased by 11.0 percent, compared with the 11.9 percent decline during the previous six months and the 2.7 percent decline during the same period last year.

Wholesale and Retail

According to the survey conducted by the Reserve Bank, covering vehicles, supermarkets and household goods, wholesale and retail sales declined by 30.2 percent in nominal terms during the six months ended June 2004, compared with the 11.7 percent increase during the six months ended December 2003, and the 15.6 percent decline during the same period of the preceding year. Vehicle sales declined by 48.1 percent and supermarket sales declined by 25.5 percent during the six months ended June 2004.

Electricity

During the six months ended June 2004, electricity consumption at 21.1 million Kwh., rose by 19.7 percent, compared with the 6.9 percent increase during the six months ended December 2003, and the 15.1 percent decline during the same period last year. The number of active consumers increased by 0.5 percent to 19,424 consumers, compared with the 0.1 percent decline during the previous six months and the 3.5 percent decline during the same period of the preceding year. Electricity prices remained unchanged at the end of June 2004 (*Figure 2*).

Inflation

Measured by the Consumer Price Index (CPI), inflation declined to 10.1 percent for the year ended June 2004 compared with 11.7 percent for the year ended December 2003 and

Figure 2. Electricity Consumption (Kwh '000)

12.3 percent for the year ended June 2003. The imported component of CPI (which accounts for 66.2 percent of the total) rose by 12.5 percent while the domestic component increased by 5.2 percent. Categories that contributed to the rise in inflation during the year ended June 2004 were tobacco and alcohol (32.7 percent), food (8.9 percent) and household operation goods (6.1 percent) (*Figure 3, S24*).

Domestic Prices

Domestic prices increased by 5.2 percent during the year ended June 2004, higher than the 0.7 percent increase for the year ended December 2003 but remained unchanged compared

Figure 3. CPI, Base Period: Nov 2002=100 (annual percent change)

with the same period last year. The increase in domestic prices reflected an increase in tobacco and alcohol by 41.6 percent, compared with the 35.2 percent increase in December 2003 and the 19.1 percent increase during the year ended June 2003. Other categories that contributed to the increase in domestic prices during the year ended June 2004 were transportation (16.3 percent) and food (6.4 percent).

Import Prices

Import prices increased by 12.5 percent during the year ended June 2004, lower than the 17.9 percent increase during the year ended December 2003 and the same period last year. The increase in import prices reflected an increase of 32.2 percent in prices of tobacco and alcohol. Other categories that contributed to the increase in import prices were household operation goods (13.7 percent), housing (11.3 percent) and food (10.3 percent).

Government 2004/05 Budget

In June 2004, the 2004/05 annual budget estimates were tabled at the Legislative Assembly. The Minister of Finance stated that challenges have multiplied, and people's needs have also continued to increase: "the needs of our young people, our elders, families on very low incomes – and especially our people on the outer islands". He stated that "government is making a concerted effort, through policies and expenditures, to address these needs and will enlist the support of our development partners in this endeavour".

Government's long-term visions

The Minister of Finance restated the government's long-term vision "that through the reform program, steady progress will be made so that the people of Tonga will enjoy a high overall quality of life, with a high standard of living throughout the Kingdom". He said that the government will respect the options of both present and future generations through an adaptive culture with high values, and through the government's social and economic development structure, individual fulfilment will feature gender equity, political stability and a stable economic and financial environment.

Budget Theme

The theme of the budget for 2004/05 is to "achieve sustainable growth with social equity". To achieve sustainable growth, the following should be maintained:

- a sound and stable financial environment with low inflation;
- adequate international reserves; and
- a sustainable overall budget position.

To accomplish these conditions the government must continue with the economic and public sector reform first embarked on in 2001, including the tax and public enterprise reforms. The structure of the economy must be reformed to create more jobs for our young people, and at the same time develop a flexible economy which can adjust rapidly to a changing global economic environment. With a strong flexible economy, Tonga will be

more able to address the needs of all its people, especially the poor. The government is intensely mindful of the economic hardship faced by certain sections of the community, particularly in the outer islands.

Budget Revenue and Expenditure

The total revenue and grants estimated to be collected by government in 2004/05 is \$117.8 million, 15.2 percent higher compared with the \$102.2 million estimated for 2003/04. This increase is associated with additional estimated tax revenues of \$4.5 million, other revenues of \$8.3 million and grant revenues of \$2.7 million.

The aggregate level of expenditure and net lending in 2004/05 is estimated to total \$128.4 million, compared to an estimated outturn of \$104.7 million for 2003/04. This is an increase of \$12.7 million in current expenditure and \$10.6 million additional capital expenditure in 2004/05. This aggregate level of expenditure comprises \$114.2 million operating expenditures and \$14.2 million of capital expenditure mainly to restore infrastructure and build a new hospital.

The overall fiscal balance is therefore estimated for a deficit of \$10.6 million and government proposes to finance the deficit through a combination of overseas concessional loans, domestic bond issues and a drawdown on the government's cash reserves.

Overseas Exchange Transactions (OET)

The following information represents an unofficial compilation of the balance of payments prepared by the Reserve Bank on the basis of the foreign exchange transactions by the banking system (S29).

Total receipts during the six months ended June 2004, were \$190.9 million, compared with \$170.9 million during the previous six months and \$135.5 million during the same period of the previous year.

Export receipts fell to \$12.6 million during the six months ended June 2004, compared with \$15.6 million during the previous six months and \$13.0 million during the same period of the preceding year. The decline in export receipts during the period reviewed is the seasonal movement after the squash season. Exports during this period were mainly fish and other marine products, vanilla and squash. Private transfers amounted to \$90.0 million over the six months ended June 2004 were seasonally lower than the \$94.4 million recorded in the previous six months but higher compared to \$70.6 million in the same period last year. Services receipts, at \$23.9 million were lower than the \$28.7 million during the previous six months and the \$27.6 million during the corresponding period of the previous year. Capital inflows recorded an amount of \$61.9 million during the six months ended June 2004, compared with \$27.8 million during the previous six months, and \$20.4 million during the same period last year. The increase in the capital inflows during the period under review was attributed to the disbursement of the second tranche of the government's loan from the Asian Development Bank (ADB), official foreign assistance, and private capital inflow.

Total payments for the six months ended June 2004, were \$132.7 million, compared with \$137.9 million during the previous six months, and \$137.8 million during the same period last year. The decline in payments reflected lower investment income and transportation payments during the period. Imports of goods accounted for 63.8 percent of total payments, private transfer payments and transportation accounted for 8.1 percent and 7.7 percent respectively, and capital outflow contributed 3.9 percent.

Merchandise imports recorded a total of \$84.6 million during the six months ended June 2004, a 0.3 percent increase compared with the 5.2 percent rise in the previous six months and the 3.0 percent decline during the same period last year. Total capital outflows decreased to \$5.2 million from \$8.8 million in the six months ended December 2003 and \$8.0 million during the corresponding period of the previous year.

The trade balance recorded a deficit of \$72.0 million during the six months ended June 2004, 4.7 percent higher compared with the \$68.8 million deficit recorded during the previous six months, and 2.3 percent higher than the \$67.3 million deficit during the same period of last year. This deficit was more than offset by other net current account inflows mainly unrequited transfers. This led to a current account surplus of \$1.6 million, compared with \$14.1 million surplus recorded during the six months ended December 2003 and a deficit of \$14.7 million in the same period of the previous year.

The current account surplus of \$1.6 million and the net capital inflows of \$56.7 million more than offset other unrecorded net outflows of \$25.2 million. Overall, a balance of payments surplus of \$33.0 million was recorded in the six months ended June 2004. This was a significant improvement in the external position of the country (OET based) when compared with the \$19.8 million surplus in the previous six months and the \$7.7 million deficit in the same period of the previous year (*Figure 4, S29*).

Figure 4. OET Trade and Current Account Balance

Gross Official Foreign Reserves

At the end of June 2004, the gross official foreign reserves increased to \$89.7 million, the highest ever recorded, compared with \$56.7 million at the end of December 2003, and \$36.9 million at the end of June 2003. The significant increase in the official foreign reserves largely reflected higher official capital attributed to the disbursement of the second tranche of the ADB loan, official foreign assistance and private capital inflows (*Figure 5, S28*).

Figure 5. Gross Official Foreign Reserves and Import Coverage (\$m:months)

At the end of June 2004, the level of official foreign reserves was equivalent to 5.4 months of imports, compared with 3.4 months at the end of December 2003, and 2.4 months at the end of June 2003 (*Figure 5, S28*).

Domestic Financial Conditions

Money Supply

The money supply M2 (including currency in circulation, demand deposits, foreign currency deposits, time and savings deposits) increased to \$178.5 million in nominal terms during the six months ended June 2004. This is a 3.2 percent increase compared with the 14.9 percent increase during the previous six months and the 0.5 percent decline in the same period of the preceding year. This growth in the money supply was attributed mainly to a 21.9 percent increase in time deposits, 6.1 percent increase in currency in circulation and 6.0 percent increase in demand deposits (*Figure 6, S2*).

Commercial Banks Lending

During the six months ended June 2004, commercial banks credit decreased by \$22.3 million to \$148.1 million, a 13.1 percent decline compared with the 9.4 percent growth

Figure 6. Money Supply (M2): Components

during the previous six months and the 5.3 percent increase during the same period last year. The decline was mainly due to a major private sector project that was refinanced from abroad. At the end of June 2004, credit to the industrial sector accounted for 34.8 percent of total outstanding credit, compared with 44.9 percent at the end of December 2003 and 45.8 percent at the end of June 2003. Commercial banks credit for housing accounted for 31.3 percent of total credit at the end of June 2004, compared with 26.1 percent at the end of December 2003 and 26.8 percent at the end of June 2003 (*Figure 7, S15*).

Figure 7. Commercial Banks Private Sector Lending

Non-Monetary Financial Institution (NMFI) Lending

Total credit extended by the NMFI decreased by \$2.1 million to \$44.1 million over the six months ended June 2004. This was a 4.6 percent decline compared with the 3.2 percent increase in the previous six months and the 10.5 percent increase over the same period of the preceding year. At the end of June 2004, credit to agriculture and fishing accounted for 37.4 percent (37.5 percent in December 2003, 37.4 percent in June 2003), other industries 17.0 percent (18.1 percent in December 2003, 23.2 percent in June 2003) and private individuals (including housing) 40.7 percent (39.3 percent in December 2003, 38.8 percent in June 2003) (*S16*).

Published Deposit Interest Rates

The nominal published annual interest rates on savings deposits reported by the commercial banks remained unchanged during the six months ended June 2004. However, the weighted average interest rate on savings deposits at 3.24 percent was slightly higher compared with 3.23 percent for the previous six months and 3.18 percent for the same period of the preceding year. The weighted average interest rate on term deposits at 6.52 percent was higher than the 5.96 percent during the previous six months and 6.00 percent during the same period last year (*Figure 8, S17*).

Figure 8. Interest Rates

Lending Interest Rates

The average published lending rates charged by the commercial banks showed some changes during the six months ended June 2004. The reported minimum prime range rate for businesses increased from 9.00 percent to 9.50 percent while the maximum prime rate increased from 10.00 percent to 10.50 percent during the six months ended June 2004. The

average published lending rate for owner occupied housing loan remained unchanged during the six months ended June 2004 at a minimum of 10.42 percent and a maximum of 11.83 percent in nominal terms. The weighted average lending rate increased slightly to 11.69 percent compared with 11.43 percent during the previous six months and 11.31 percent during the same period last year.

The Non-Monetary Financial Institution (NMFI) published lending rates remained unchanged during the six months ended June 2004. The business prime range lending rate remained unchanged at a minimum of 10.0 percent and a maximum of 12.0 percent. The published lending interest rates for owner occupied housing loan also remained unchanged: the minimum rate was 11.0 percent and the maximum rate was 15.0 percent (*S18*).

Overall in real terms (after accounting for inflation), most lending rates are positive while rates paid on deposits are negative. This asymmetry would continue to distort the allocation of resources in the economy.

Government Bonds

At the end of June 2004, the stock of Government Bonds in circulation totalled \$20.9 million, of which 23.5 percent were held by the commercial banks. These bonds were issued at terms ranging from 2 years to 5 years, carrying an interest rate ranging from 5.0 percent per year in nominal terms to 6.75 percent.

Bilateral Exchange Rates

At the end of June 2004, the pa'anga appreciated against the Australian dollar by 9.5 percent, the New Zealand dollar by 4.5 percent, the Fijian dollar by 3.8 percent, the United States dollar by 1.0 percent and the Japanese yen by 2.0 percent (*Figure 9, S40*).

Figure 9. End Period Bilateral Exchange Rates - Selected Currencies/TOP\$

Nominal Effective Exchange Rate

At the end of June 2004, the nominal effective exchange rate, which refers to the average bilateral exchange rates weighted by current account shares, appreciated by 5.5 percent, compared with the 4.1 percent depreciation during the previous six months and the 9.4 percent depreciation over the same period of the preceding year. The movement mainly reflected the appreciation of the pa'anga against other currencies over this period (*Figure 10, S42*).

Figure 10. Nominal and Real Effective Exchange Rate (June 1991=100)

Real Effective Exchange Rate

At the end of June 2004, the real effective exchange rate, which refers to the average bilateral exchange rates weighted by the current account shares and taking into account the inflation rate differentials, appreciated by 6.6 percent. This is compared with the 2.0 percent appreciation during the six months ended December 2003, and the 0.4 percent depreciation during the same period last year. The appreciation of the real effective exchange rate implies a deterioration in the competitiveness of Tongan goods and services relative to its major trading partners. This reflected the higher inflation rate in Tonga relative to its major trading partners (*Figure 10, S42*).

Notes to Statistical Tables

Financial years end in June.

Tables A1 - C2, Pages S1 - S18

Monetary data are sometimes adjusted to incorporate revisions received from the domestic banking system.

Tables A1 - B7, Pages S1 - S16

Monetary data in these tables had been revised back to 1996 in July 2003.

Table A1 - Pages S1 - S2

1. Comprises consolidated balance sheet of the NRBT and the commercial banks.
2. This includes the holdings of the Reserve Bank and the commercial banks.
3. Nonmonetary financial institutions (NMFI) are those which do not combine the taking of deposits with the extension of credit.

Table A2 - Pages S3 - S4

1. Comprises the consolidated balance sheet of the NRBT, commercial banks and the NMFI.
2. These data may differ slightly from the comparable data shown on Statistical Table S2 because of savings deposit holdings of the NMFI in the two Niua.
3. Comprises bills and promissory notes issued by financial sector and held outside that sector.
4. Represents borrowing by Government from foreign sources for onlending to NMFI's

Table A3 - Page S5

1. Non-Financial Public Enterprises.
2. Non-Monetary Financial Institutions.

Table A4 - Page S6

1. Includes pre-decimal issues and a minor value of 50 seniti notes.
2. Includes pre-decimal issues and a minor value of \$1 and \$2 coins.

Table B1 - Pages S7 - S8

1. In March 1993, NRBT introduced a Required Reserve deposit for commercial banks. This was revised in December 1995, in September 1998, and in September 2000.
2. In April 1993, NRBT replaced Term Deposits of commercial banks with NRBT Notes.

Table B2 - Pages S9 - S10

1. These data sometimes differ slightly from the comparable data shown on Statistical Table S15.

Table B3 - Pages S11 - S12

1. These data sometimes differ slightly from the comparable data shown on Statistical Table S16.

2. Direct borrowing by NMFI from foreign sources. Some exchange risk is assumed by Government.
3. Represents borrowing by Government from foreign sources for onlending to NMFI. Exchange risk is carried by Government.

Table B5 - Page S14

1. Data exclude deposits held by the Government.

Table B6 - Page S15

1. Includes lending to the manufacturing, transport and communications, commerce and trade, construction, and services sectors.
2. Includes nonprofit bodies.

Table B7 - Page S16

1. Non-Financial Public Entities.
2. Includes lending to the manufacturing, transport, and communications, commerce and trade, construction, and services sectors.

Table C1 - Page S17

1. Interest rates listed are those available to general customers & to statutory boards.
2. This reflects average commercial bank published interest rates paid for savings deposits and for 3 to 48 month term deposits, weighted according to the amounts in these categories.

Table C2 - Page S18

1. Base rate is lowest rate charged. Prior to the December quarter 1992, this was the preferential rate. This is the average minimum prime rate published by the commercial banks.
2. This refers to the average minimum rate published by the commercial banks on their residential housing loans.
3. Apply to loans for export-oriented industries, manufacturing & raw materials processing, and tourism activities except restaurants.
4. This is the maximum rate published by the NMFI on their business loans.
5. Loans less than \$1,000 for activity in agriculture, fisheries and livestock.

Table C3 - Page S19

1. Short Term: Three months Treasury Bills except for Japan, Private Bill Rate.
2. Long Term Government Bonds: Ten year Government Bonds except for Australia, Treasury Bonds : 15 years.

Table D1 - Page S20

1. End-period, minimum retail price per litre of petrol sold by major distributors in Nuku'alofa, including sales tax.
2. End-period, most common (level 2) rate group including any surcharges.

Table D2 - Page S21

1. Data reflect the recorded values of Tongan agricultural products sold in Talamahu Market, the largest market in the Kingdom. The quality of these data, particularly in earlier periods, is suspect and should be used with care. In addition, as it is likely that this market is covering a declining share of the total trade in these products, longer-term trends should be interpreted with care.
2. Comprising kape, cassava, taro, yams, sweet potatoes and mixed foods.

Table D2 - D4, Page S21 - S23

These data had been revised back to December 2000 in March 2001 to incorporate minor adjustment of data.

Table D3 - Page S22

1. Comprising kape, cassava, taro, yams, sweet potatoes and mixed foods.

Table D4 - Page S23

1. Comprising kape, cassava, taro, yams, sweet potatoes and mixed foods.

Table D5 - Page S24

1. CPI as published by the Statistics Department. The base period of November 2002 = 100.

Table E1 - Page S25

This table had been revised to incorporate latest update to original estimates.

1. Source: Ministry of Finance Budget Statement Documents.

Table E2 - Page S26

This table had been revised back to 2000/01 to reflect latest update to original estimates.

1. Groupings are those used by Statistics Department in Statistical Abstract, 1987.
2. Includes Government Supplies.
3. Source: Ministry of Finance Budget Statement Documents.

Table E3 - Page S27

1. Comprises Cable & Wireless loan in Tongan Pa'anga.

Table E4 - Page S27

1. Comprises Tonga Broadcasting Commission and Primary Produce Export Limited (PPEL).
2. Source: Ministry of Finance Budget Statement Documents.

Table F1 - Page S28

This table had been revised to reflect update of Trade date particularly the month of import cover.

1. Prior to the establishment of the NRBT, these assets were held by the Commissioners of Currency, the Commissioners of Coinage, Treasury and the BoT. This includes only the holdings of the Reserve Bank.
2. Imports, cif. in the year to date concerned. Where latest data is not yet available this is estimated by NRBT.

Table F2 - Page S29

1. This is NRBT's own estimates based on the Overseas Exchange Transactions (OET) records.
2. Data has been partially reclassified into official capital and financial inflows.
3. Corrections for March 2003 annual totals, other items net and overall balance.

Table F3 - Page S30

1. Comprising kape, cassava, taro, yams, sweet potatoes and 'mixed' foods.
2. Includes kava exports.

Table F4 - Page S31

Comprise kape, cassava, taro, yams, sweet potatoes and mixed foods. Given the non-homogenous nature of the group, movements in unit values should be assessed with caution.

Table F5 - Page S32

1. Including Hawaii and American Samoa.

Table F6 - Page S33

1. Data should be used with caution on account of difficulty separating tourist receipts from private remittances.
2. Recent data provided from the Tonga Visitors Bureau are provisional and are updated when available.

Table F7 - Page S34

1. Using the new HS (Harmonized System) it had an effect on the categories. Due to the introduction of the new HS in replacement of the SITC system, changes were made to all the categories of imports.

Table F8 - Page S35

1. Imports under aid or grants.

Table F10 - Page S37

Given the non-homogenous nature of some of these categories, movements in unit values should be assessed with extreme caution.

1. Comprises all categories of SITC code 732 for which volume data are collected. Unit values are affected by changes in the composition of these imports.

Table F11 - Page S38

1. Including Hawaii and American Samoa.

Table F13 & F14 - Page S40 & S41

1. The calculation of the bilateral exchange rates is based on the average of the mid-points published by the commercial banks for the concerned period.
2. On the 1st January 1999, the "euro" became the official currency for 11 European countries: Germany; France; Belgium; Spain; Ireland; Italy; Luxemburg; the Netherlands;

Table F15 - Page S42

Note: These indices measure inflation in Tonga against those in the nominated countries adjusted for exchange rate movements. Each index measures the relative competitiveness between Tonga and the country specified. Increases in the index indicate that Tonga is becoming less competitive.

This table was revised in March 2002 going back to 1995 to incorporate linking inconsistencies.

1. The nominal effective exchange rate index represents movements in the average of bilateral exchange rates with the pa'anga, weighted by current account shares.
2. The real effective exchange rate index measures the competitiveness of the Tongan economy against the countries specified weighted by their shares in Tonga's trade in goods and services.

Table G1 - Page S43

1. Quarterly series are seasonally adjusted quarterly percent changes at annual rates.
2. Real GDP growth for 1994/95 - 1998/99 has been revised in the 1999/2000 Budget Statement.
3. Calendar year, i.e. 1996/97 equals 1996.
4. Financial years end in March.
