1. Before the 4th quarter of 2009, the data cover agricultural products sold in the Talamahu Market. After that time the data also capture the values of agricultural products sold in the 'Utukalongalu (Vava'u) and Roadside Markets. The quality of these data, particularly in earlier periods, should be used with care. In addition, it is likely that this market is covering a declining share of the total trade in these products, longer-term trends should be interpreted with care.

All data back to, and including, the first quarter of 2012 were revised, resulting in a large series break at that quarter.

2. The "euro" became the official currency for 11 European countries: Germany; France; Belgium; Spain; Ireland; Italy; Luxemburg; the Netherlands; Austria; Portugal and Finland.

Table F15 - Page S40

Note: The real bilateral exchange rate indices measure the combined effects of inflation differences and exchange rate changes between Tonga and the reported country, to gauge changes in the relative competitiveness of producers in both countries. Increases in the indices correspond to deterioration in the relative competitiveness of Tonga's producers. The real effective exchange rate averages the real bilateral rates for Tonga's major trading partners, as measured by the sum of imports and exports. The nominal effective exchange rate simply averages the movement of the pa'anga against the currencies of Tonga's major trading partners. The methodology for calculating these rates, including the full history of data, was updated in March 2015.
